Grants for Energy Efficiency Upgrades - Newfoundland -

Federal ecoENERGY Retrofit Homes Program

Up to \$5000 available

(NOT dependent upon income, NOT taxable)

The Federal Government offers post-retrofit grants to homeowners who adequately improve their home's energy efficiency. To be eligible, homeowners must first have a pre-retrofit Home Energy Evaluation performed by a licensed Energy Advisor. Homeowners then have up to 18 months to complete any work and have a follow-up evaluation conducted, verifying that retrofits were made.

Eligibility: To be eligible for federal grants homeowners must have a home energy evaluation conducted BEFORE they begin retrofits. Grant amounts are NOT dependent upon income and are NOT taxable.

Cost: The cost of the initial evaluation is \$300 plus tax for houses up to 2500 sq. ft., including the basement. For larger homes there is an additional \$25 for each 500 sq. ft. increase. The cost of the follow-up evaluation is \$150 plus tax.

For more information, or to request an evaluation, call us today.
